

Ultra Butyl Corner Clip

Product Data Sheet

Description

Elgen's Ultra Corner System consist of the Patent Pending Ultra Corner stamped C or F stackable for automatic or manual insertion into roll form flange, combined with Patent Pending Ultra Bolt's unique 5/16 drive head and the patented Ultra Butyl corner clip and you have a 4 bolt system designed to ease installations of duct work. The results will be up to 50% or better cost savings per joint made in the shop or field.

Features

- * Ultra Bracket is form injected and then fitted with Elgen's 440 butyl gasket tape, UL 723 listed
- * Use with Elgen Ultra Corner and Elgen C or F corner for flange connections.
- * Install into Ultra Corner flange joint before prepping with duct wrap and shipping to project site
- * No waiting for sealer to dry before using Elgen duct wrap to cover ends for protection against dust and debris
- * Meets SMACNA requirement per 2005 3rd edition HVAC duct construction standards
- * Eliminate waste of butyl gasket by applying the same amount every time
- * Installer can lay down straight ribbons of Butyl gasket tape against the flange without stopping to make a corner bow.
- * Ultra Bracket tab can be seen from the exterior of the duct to confirm application
